MODEL No. GP2D	15	PAGE 1/8

1. Application

This specification applies to the outline and characteristics for digital output type distance measuring sensor, Model No. GP2D15.

2. Outline

Refer to the attached drawing No. SOD03417.

3. Ratings and characteristics

- 3-1 Constitution diagram: Refer to the attached sheet, page 4.
- 3-2 Absolute maximum ratings: Refer to the attached sheet, page 4.
- 3-3 Electro-optical Characteristics: Refer to the attached sheet, page 5.
- 3-4 Timing chart: Refer to the attached sheet, page 5.

4. Reliability

Refer to the attached sheet, page 6.

5. Incoming inspection

Refer to the attached sheet, page 7.

6. Supplement

6-1 GP2D15 Example of Output distance characteristics

Refer to the attached sheet, page 8.

6-2 ODS materials

This product shall not contain the following materials.

Also, the following materials shall not be used in the production process for this product.

Materials for ODS: CFC_S, Halon, Carbon tetrachloride, 1.1.1-Trichloroethane (Methylchloroform)

6-3 Brominated flame retardants

Specific brominated flame retardants such as the $PBBO_S$ and PBB_S are not used in this device at all.

6-4 Product mass: 3.6g (TYP.)

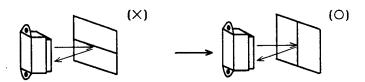

ED-98092 May 18, 1998

7. Notes

- 7-1 Lens of this device shall be kept cleanly. There are cases that dust, water or oil and so on deteriorate the characteristics of this device. Please consider in actual application.
- 7-2 In case that protection cover is set in front of the emitter and detector portion, the protection cover which has the most efficient transmittance at the emitting wavelength range of LED for the GP2D15 (λ =850nm±70nm), shall be recommended to use. The face and back of protection cover should be mirror polishing. Also, as there are cases that the characteristics may not be satisfied with according to the distance between the protection cover and the GP2D15 or the thickness of the protection cover, please use the GP2D15 after confirming the operation sufficiently in actual application.
- 7-3 In case that there is an object near to light exits of the sensor between the sensor and the detected object, please use this device after confirming sufficiently what the characteristics of this sensor do not change by the object.
- 7-4 When the detector surface receive direct light from the sun, Tungsten lamp and so on, there are cases that it can not measure the distance exactly. Please consider the design that the detector does not receive direct light from such light source.
- 7-5 Distance between sensor and mirror reflector can not sometimes measure exactly.

 In case of changing the mounting angle of the GP2D15, it may measure the distance exactly.
- 7-6 In case that reflective object has boundary line clearly, there is cases that distance can not measure exactly. At that time, if direction of boundary line and the line between emitter center and detector center parallels, it is possible to decrease deviation of measuring distance.

7-7 In order to decrease measuring error by moving direction of object, we recommend to mount the sensor like below drawing.

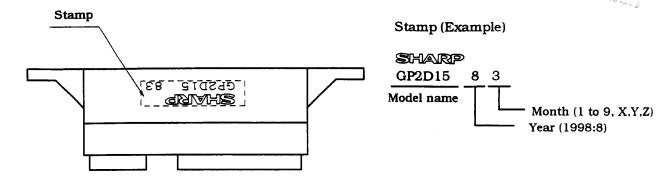

- 7-8 In order to stabilize power supply line, we recommend to connect a by-pass capacitor of $10 \mu F$ or more between Vcc and GND near the GP2D15.
- 7-9 Please don't do washing. Washing may deteriorate the characteristics of optical system and so on.
- 7-10 There are some possibilities that the sensor inside the case package with lens may be exposed to the excessive mechanical stress. Please be careful not to cause any excessive pressure on the case package with lens and also on the PCB at the assembly and inserting of the set.

2. Outline (Drawing No. SOD03417)

Scale: 2/1

Unit: mm

Connector signal

	Signal name
\odot	Vo
2	GND
3	Vcc

Connector: J.S.T. TRADING COMPANY, LTD.

S3B-PH

Note 1) * dimension shall be reference lens center.

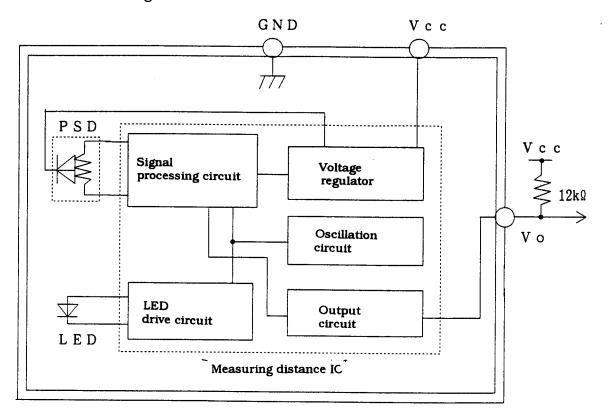

Note 2) Unspecified tolerance shall be ± 0.3 mm.

3-3 Electro-optical Characteristics

(Ta=25°C, Vcc=5V)

Parameter	Symbol	Conditions	Min.	Тур.	Max.	Unit
Measuring distance range	ΔL	(*1) (*3)	10	-	80	cm
Output terminal voltage	V _{OH}	Output voltage at high level (*1)	Vcc -0.3	-	-	
	V _{OL}	Output voltage at low level (*1)	-	_	0.6	V
Output distance characteristics	Vo	(*1) (*2) (*4)	21	24	27	cm
Average supply current	Icc		•	33	50	mA

- L: Distance to reflective object
- (*1) Using reflective object : White paper (Made by Kodak Co. Ltd. gray cards $R-27 \cdot white face, reflective ratio; 90%)$
- (*2) We ship the device after the following adjustment: Output switching distance L=24cm ± 3 cm must be measured by the sensor
- (*3) Possible distance measuring range (of the sensor optics)
- (*4) Output switching has a hysteresis width. The distance specified by Vo should be the one with which the output L switches to the output H.

4. Reliability

The reliability of products shall satisfy items listed below.

Confidence level: 90% LTPD: 20%/40%

No.	Test Items	Test Conditions	Failure Judgement Criteria	Samples (n) Defective(C)
1	Temperature cycling	1 cycle -40°C ←→+70°C (30min) (30min) 25 cycles test		n=11, C=0
2	High temp. and high humidity storage	+40°C,90%RH, 500h		n=11, C=0
3	High temp. storage	+70°C, 500h	Initial $ imes$ 0.8 $>$ Vo	n=11, C=0
4	Low temp. storage	-40℃, 500h	Vo $>$ Initial \times 1.2	n=11, C=0
5	Operation life (High temp.)	+60°C, Vcc=5V, 500h	(*1)	n=11, C=0
6	Mechanical shock	100m/s^2 , 6.0ms 3times/ $\pm X$, $\pm Y$, $\pm Z$ direction		n= 6 , C=0
7	Variable frequency vibration	10 to 55 to 10Hz/1min Overall amplitude : 1.5mm 2h/X, Y, Z direction		n= 6 , C=0

^{*1} Test conditions are according to 3-3 Electro-optical characteristics.

^{*2} After test, measurement shall be measured after leaving under the normal temperature and the normal humidity for two hours. But, no dew point.

5. Incoming inspection

(1) Inspection lot

Inspection shall be carried out per each delivery lot.

(2) Inspection method

A single sampling plan, normal inspection level $\, \overline{\mathbb{I}} \,$ based on ISO 2859 shall be adopted.

Defect	Inspection items and test method	AQL(%)
Major defect	Electro-optical characteristics defect (In para. 3-3)	0.4
Minor defect	Defect on appearance and dimension	1.0

Split
Chip
Scrate

One which affects the characteristics

Scratch of para. 3-3 shall be defect. Stain
