

# BUK95/96/9E06-55B

N-channel TrenchMOS™ logic level FET

Rev. 03 — 30 November 2004

Product data sheet

## 1. Product profile

### 1.1 General description

N-channel enhancement mode field-effect power transistor in a plastic package using Philips High-Performance Automotive (HPA) TrenchMOS™ technology, featuring very low on-state resistance.

### 1.2 Features

- TrenchMOS™ technology
- 175 °C rated
- Q101 compliant
- Logic level compatible.

### 1.3 Applications

- Automotive systems
- Motors, lamps and solenoids
- 12 V and 24 V loads
- General purpose power switching.

### 1.4 Quick reference data

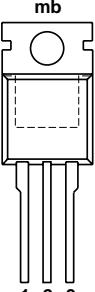

- $E_{DS(AL)S} \leq 679 \text{ mJ}$
- $I_D \leq 75 \text{ A}$
- $R_{DSon} = 5.1 \text{ m}\Omega \text{ (typ)}$
- $P_{tot} \leq 258 \text{ W}$ .

## 2. Pinning information

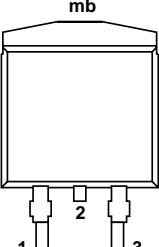

Table 1: Pinning

| Pin | Description                              | Simplified outline | Symbol |
|-----|--|--------------------|--------|
| 1   | gate (G)                                 |                    |        |
| 2   | drain (D)                                | [1]                |        |
| 3   | source (S)                               |                    |        |
| mb  | mounting base;<br>connected to drain (D) |                    |        |

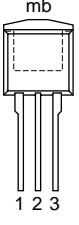

**SOT78 (TO-220AB)**

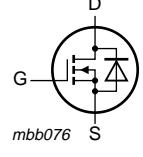

**SOT404 (D<sup>2</sup>-PAK)**

**SOT226 (I<sup>2</sup>-PAK)**

**Symbol**

[1] It is not possible to make a connection to pin 2 of the SOT404 package.

**PHILIPS**

### 3. Ordering information

**Table 2:** Ordering information

| Type number | Package             |   |  | Version |
|-------------|---------------------|---|--|---------|
|             | Name                | Description   |  |         |
| BUK9506-55B | TO-220AB            | Plastic single-ended package; heatsink mounted; 1 mounting hole; 3-lead TO-220AB                                  |  | SOT78   |
| BUK9606-55B | D <sup>2</sup> -PAK | Plastic single-ended surface mounted package (Philips version of D <sup>2</sup> -PAK); 3 leads (one lead cropped) |  | SOT404  |
| BUK9E06-55B | I <sup>2</sup> -PAK | Plastic single-ended package (Philips version of I <sup>2</sup> -PAK); low-profile 3 lead TO-220AB                |  | SOT226  |

### 4. Limiting values

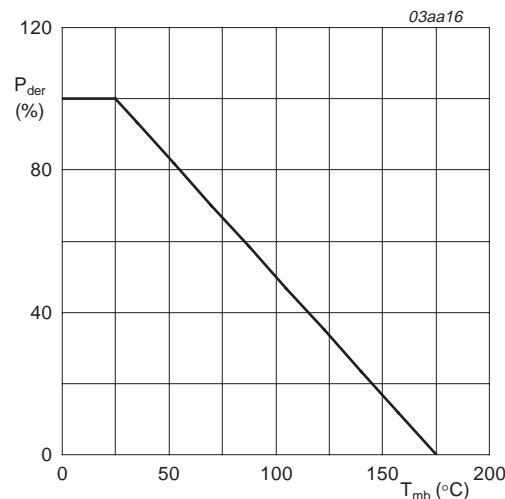

**Table 3:** Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134).

| Symbol                      | Parameter                                    | Conditions   | Min | Max      | Unit             |
|-----------------------------|--|--|-----|----------|------------------|
| $V_{DS}$                    | drain-source voltage (DC)                    |  | -   | 55       | V                |
| $V_{DGR}$                   | drain-gate voltage (DC)                      | $R_{GS} = 20 \text{ k}\Omega$  | -   | 55       | V                |
| $V_{GS}$                    | gate-source voltage (DC)                     |  | -   | $\pm 15$ | V                |

| $I_{DRM}$                   | peak reverse drain current                   | $T_{mb} = 25^\circ\text{C};$ pulsed; $t_p \leq 10 \mu\text{s}$   | -   | 587      | A                |
| <b>Avalanche ruggedness</b> |  |  |     |          |                  |
| $E_{DS(AL)S}$               | non-repetitive drain-source avalanche energy | unclamped inductive load; $I_D = 75 \text{ A}; V_{DS} \leq 55 \text{ V}; R_{GS} = 50 \Omega; V_{GS} = 5 \text{ V};$ starting at $T_j = 25^\circ\text{C}$ | -   | 679      | mJ               |

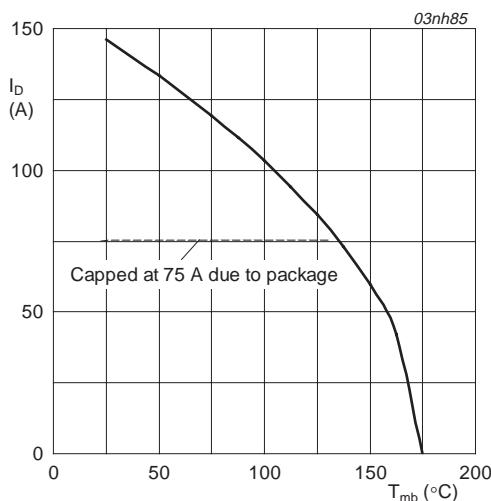

[1] Current is limited by power dissipation chip rating

[2] Continuous current is limited by package

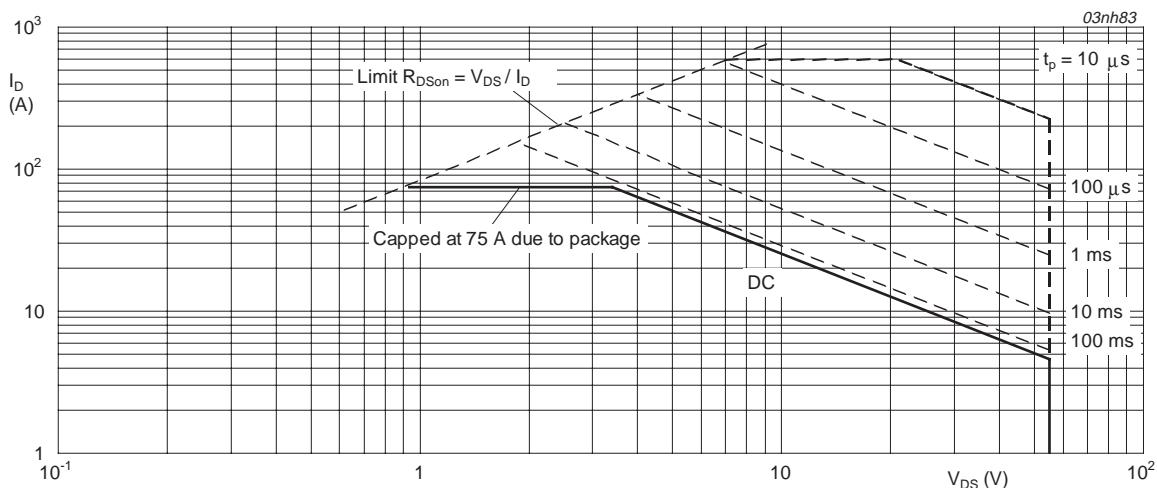

$$P_{der} = \frac{P_{tot}}{P_{tot}(25^{\circ}\text{C})} \times 100\%$$

**Fig 1.** Normalized total power dissipation as a function of mounting base temperature.

V<sub>GS</sub> ≥ 5 V

**Fig 2.** Continuous drain current as a function of mounting base temperature.

T<sub>mb</sub> = 25 °C; I<sub>DM</sub> is single pulse.

**Fig 3.** Safe operating area; continuous and peak drain currents as a function of drain-source voltage.

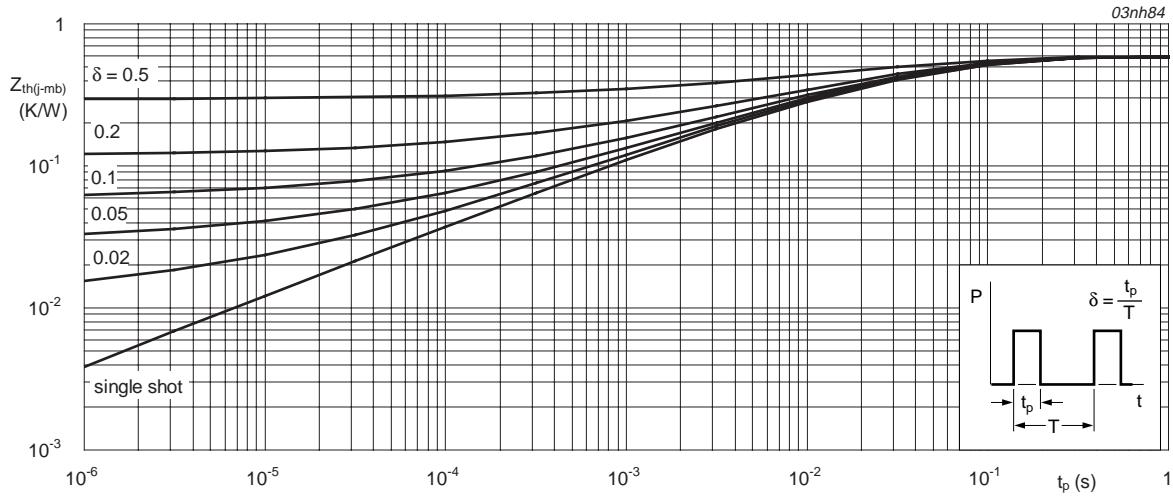

## 5. Thermal characteristics

**Table 4: Thermal characteristics**

| Symbol                | Parameter   | Conditions   | Min | Typ | Max  | Unit |
|-----------------------|---|--|-----|-----|------|------|
| $R_{th(j\text{-}mb)}$ | thermal resistance from junction to mounting base | <a href="#">Figure 4</a>   | -   | -   | 0.58 | K/W  |
| $R_{th(j\text{-}a)}$  | thermal resistance from junction to ambient       |  |     |     |      |      |
|                       | SOT78 (TO-220AB) and SOT226 (I <sup>2</sup> -PAK) | vertical in free air   | -   | 60  | -    | K/W  |
|                       | SOT404 (D <sup>2</sup> -PAK)                      | mounted on a printed-circuit board; minimum footprint; vertical in still air | -   | 50  | -    | K/W  |

### 5.1 Transient thermal impedance

**Fig 4.** Transient thermal impedance from junction to mounting base as a function of pulse duration.

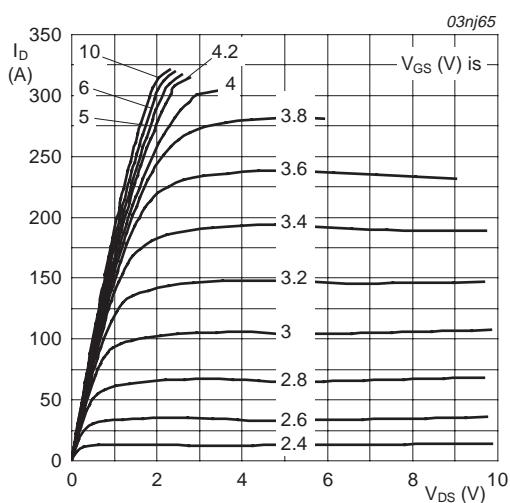

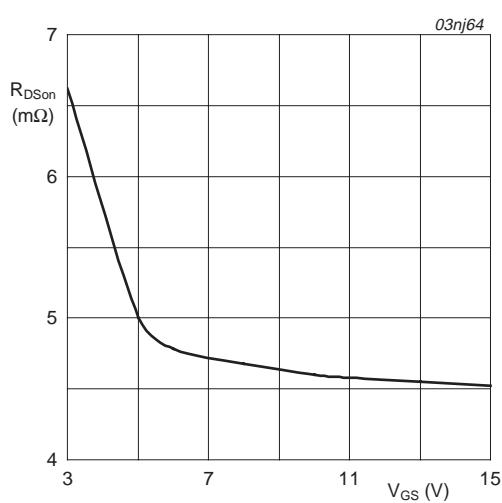

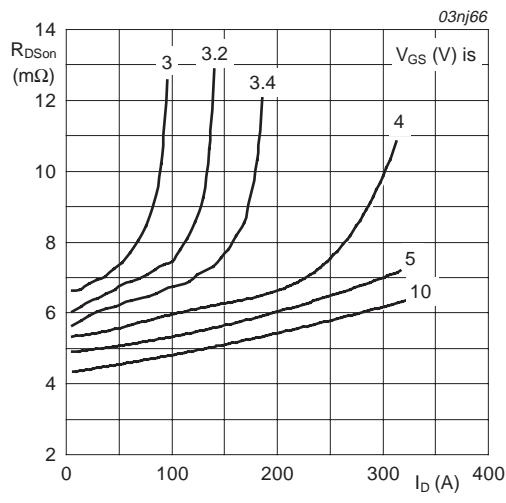

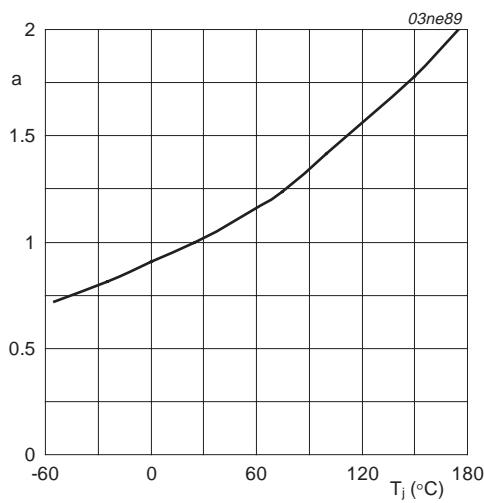

## 6. Characteristics

**Table 5: Characteristics** $T_j = 25^\circ\text{C}$  unless otherwise specified.

| Symbol                         | Parameter                        | Conditions   | Min | Typ   | Max   | Unit             |

## 10. Data sheet status

| Level | Data sheet status [1] | Product status [2][3] | Definition   |
|-------|-----------------------|-----------------------|--|
| I     | Objective data        | Development           | This data sheet contains data from the objective specification for product development. Philips Semiconductors reserves the right to change the specification in any manner without notice.  |
| II    | Preliminary data      | Qualification         | This data sheet contains data from the preliminary specification. Supplementary data will be published at a later date. Philips Semiconductors reserves the right to change the specification without notice, in order to improve the design and supply the best possible product.             |
| III   | Product data          | Production            | This data sheet contains data from the product specification. Philips Semiconductors reserves the right to make changes at any time in order to improve the design, manufacturing and supply. Relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). |

[1] Please consult the most recently issued data sheet before initiating or completing a design.

[2] The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL <http://www.semiconductors.philips.com>.

[3] For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

## 11. Definitions

**Short-form specification** — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

**Limiting values definition** — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Application information** — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

**Right to make changes** — Philips Semiconductors reserves the right to make changes in the products - including circuits, standard cells, and/or software - described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no licence or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.

## 13. Trademarks

TrenchMOS — is a trademark of Koninklijke Philips Electronics N.V.

## 12. Disclaimers

**Life support** — These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors
